

Good Evening,

Thank you for your courageous efforts battling COVID-19 and being on the front line of the response to this pandemic.

We know that many of you are caring for patients despite a shortage of safety equipment and other essential supplies, while potentially contending with a lack of sick leave or other financial concerns. It is important to us that we hear directly from our members to help serve you best, and even more important that your members of Congress hear directly from you.

Through your feedback, we know that COVID-19 is causing stress, shortages in personal protective equipment (PPE) and overloading our public health system. So today, we activated two grassroots initiatives to increase public pressure on lawmakers. **Here's how you can help:**

1. [Tweet to lawmakers](#): Apply pressure to Congress through social media
2. [Email your lawmaker](#): Tell your story to help put a face on the need and push for change

In addition to our advocacy efforts and grassroots campaigns, we will continue to update you on COVID-19 related issues, resources and concerns as the situation evolves each day. Your AOA is here for you.
